reBOOT CANADA™
Computers • Community • Connection

Getting Started

Plug in and power on

1. Plug your computer into a power outlet.
2. Power on your computer.
3. The power button symbol will look like this: ⏻
4. If the power button is not on the front or top of your computer, it may be on the side.

Connect

5. Select the Network icon (a little globe) on the taskbar on bottom right side corner of your screen to open quick settings.

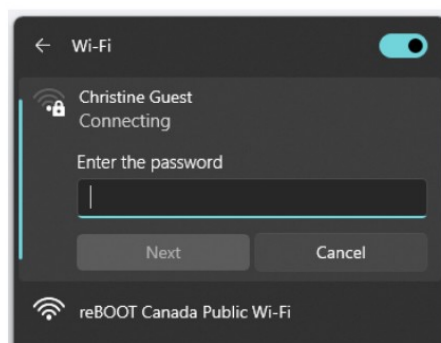

2. On the Wi-Fi quick setting, select

Manage Wi-Fi connections

3. Choose the Wi-Fi network you want, then select **Connect.** Type in the password for the chosen Wi-Fi network.

THERE IS NO PASSWORD FOR YOUR COMPUTER

Default Username: User
Leave password field blank if it asks for password

Security tips

- Protect your passwords
- Don't use the same password for everything
- Don't click on unknown links, always verify before click.
- Don't share credit card or banking information in emails. Banks & phone companies will NEVER ask for information over emails!
- Never give anybody, you do not know or trust, access to your computer
